EXPERIENCE

AI Full Stack Developer & Solution Architect

D4Insight Tech & Emirates NBD

05/2024 - Present | Dubai

- Built and maintained an AI Speech-to-Summary pipeline, Node.js, and LangChain with modular prompt engineering and RAG patterns — advancing client meeting summaries with scalable multi-agent features.
- Shipped MCP server plugins for Claude AI: PII Detector (real-time redaction), Insomnia cURL Generator (one-click export), Caveman Compressor (payload optimization), and Audit & Reset (API session management).
- Designed and showcased a Salary Agent concept — an agentic, salary-linked investment assistant with multi-agent LangChain architecture — prototyped and presented to the ENBD X innovation team.
- Designed backend-heavy microservices in Node.js and Java for wealth trading journeys across Monthly Investment Portfolio, Dual Currency Investment, and Physical Gold platforms with real-time price alerts — increasing user retention by 15%.
- Led design and launch of the Dual Currency Investment product, integrating complex FX payout logic and real-time market data.
- Specialized in resilient system design: retry strategies, idempotent operations, circuit breakers, and distributed tracing.
- Architected and delivered Gold platform capabilities, including purchase, sale, and redemption with blended workflows, utilizing Kafka for robust, event-driven handling.
- Accelerated release cycles by 30% via improved CI/CD processes with Playwright automation, enhancing reliability across web, iOS, and Android platforms.
- Expert in designing resilient systems utilizing retry strategies, idempotent operations, circuit breakers, and distributed tracing for system reliability.

Lead Full Stack Developer

Royal Bank of Canada (RBC)

04/2023 - 05/2024 | Toronto, Canada

- Managed design & build of Wealth Management Advisor Portal (Node.js, Angular, GraphQL), enhancing advisor efficiency and cutting onboarding time by 25%
- Optimized microservices for heavy queries, improving response times by 40%
- Integrated GraphQL to streamline data fetch, vastly improving UI speed
- Directed development milestones from initial steps through final delivery

Lead Front End Developer

Accenture

05/2022 - 04/2023 | Toronto, Canada

- Improved TD Bank's app compliance, addressing 100% of accessibility issues, resulting in design consistency across web platform.
- Created reusable Angular components to address development inefficiencies, boosting productivity by 20%.
- Streamlined development cycles by addressing slow processes, implementing CI/CD pipelines with Jenkins and Urban Code, resulting in faster releases.
- Optimized existing TypeScript codebase, resulting in a reduction in loading times and improved application performance.

Full Stack Developer

Tata Consultancy Services

10/2019 - 03/2022 | Toronto, Canada

- Migrated 10+ enterprise applications to OpenShift, improving deployment performance and infrastructure resilience.
- Increased user engagement by 35% engineering interactive advisor dashboards with Angular and Redux.

Earlier Career

TCS Ltd, Mumbai and Infosys, Pune

2012 - 2019 | India

- **TCS Ltd, Mumbai** (Technical Developer, 2015–2019)
- **Infosys, Pune** (Developer, 2012–2014)
- Enterprise web applications, ASP.NET MVC, Angular, UI/UX revamp, and retail platform optimization

SUMMARY

Dynamic **AI Full Stack Engineer and Solution Architect** with 12+ years of experience building scalable, high-performance systems across banking and enterprise domains. Specializing in **LLM orchestration, agentic AI system design, and RAG (Retrieval-Augmented Generation)** pipeline development using **LangChain, LangGraph, OpenAI API, Azure AI Studio, and MCP (Model Context Protocol).** Proven record of shipping production-grade AI features — including multi-agent pipelines, speech-to-summary systems, and AI-powered developer tools — on a strong foundation of Node.js, TypeScript, Angular, Kafka, and MongoDB. Passionate about transforming traditional architectures into intelligent, context-aware solutions that enhance decision-making and customer experience.

SKILLS

LangChain | Lang Graph | OpenAI API | Generative AI | Prompt Engineering | RAG (Retrieval-Augmented Generation) | Vector Databases (Chroma DB / Pine cone) | Agentic AI | n8n | MCP | Lang Smith | Azure AI Studio | Multi-Agent Orchestration | Palantir Foundry & Palantir AIP

Node.js | TypeScript | JavaScript | Python | Angular | React | Next.js | NestJS | GraphQL | ASP.NET MVC | Java

Azure | Kubernetes | OpenShift | Docker | PCF | Jenkins | Railway Cloud

PostgreSQL | MongoDB | Firestore | Redis

Playwright | Jest | Mocha | Cypress

Microservices | Scalable APIs | REST & GraphQL Design

EDUCATION

Master of Science in Artificial Intelligence (In progress)

University of Texas

01/2024 - 05/2027 Austin, USA

Bachelor of Science in Computer Science

WIEECT

07/2011 Mumbai

PROJECTS

Claude MCP Plugin Suite

Plugins and skills

- Built a suite of Model Context Protocol (MCP) server tools for Claude AI: PII Detector for real-time payload data redaction, Insomnia cURL Generator with Insomnia collection export, Caveman Compressor for request/response payload optimization, and Audit & Reset for API session lifecycle management. Enables AI-native, Claude-assisted API development workflows.

CanopyAds.io – AI-Enabled Outdoor Advertising Platform

Ad-tech Platform

- Built and deployed a self-serve ad-tech platform for the UAE taxi-top and billboard ads with real-time Google Maps previews, powered by a scalable Node.js + PostgreSQL backend on Railway.

TRAINING / COURSES

Agentic AI | DeepLearning.AI

Machine Learning | UT Austin

Microsoft Certified: Azure Fundamentals

Palantir Foundry & AIP — Scoping Use Cases for Foundry & AIP | Palantir Technologies, 2025

Palantir Foundry & AIP — Introduction to Foundry & AIP for Enterprise Organizations | Palantir Technologies, 2025
